

Coronavirus (COVID 19) - Guidance Document: 2

Latest advice and guidance help us take steps to protect the public, our volunteers and staff

Temporary Closure of Offices

As we are now aware, COVID-19 is spreading more rapidly in London than in other regions.

Following our previous decision to postpone and reschedule our public engagement work (as a precautionary measure to protect the public, Healthwatch staff and volunteers) and taking note of the Prime Minister's advice that:

- People should stop non-essential contact with others
- People should work from home where they can
- People should stop all unnecessary travel

We have decided to close our offices until further notice. We shall continue to monitor the situation and take advice.

Supporting the public information drive

Healthwatch has a key role when it comes to providing information for the public. We will be fully supporting the Government's public information campaign and prioritise this activity through our social media channels to raise awareness of how to prevent the spread of COVID-19 infection.
